**Scaricare online book Italiani Running on Ritalin Lawrence H. Diller** , In a book as provocative and newsworthy as *Listening to Prozac* and *Driven to Distraction*, a physician speaks out on America's epidemic level of diagnoses for attention deficit disorder, and on the drug that has become almost a symbol of our times: Ritalin.

In 1997 alone, nearly five million people in the United States were prescribed Ritalin--most of them young children diagnosed with attention deficit disorder. Use of this drug, which is a stimulant related to amphetamine, has increased by 700 percent since 1990. And this phenomenon appears to be uniquely American: 90 percent of the world's Ritalin is used here. Is this a cause for alarm--or simply the case of an effective treatment meeting a newly discovered need? Important medical advance--or drug of abuse, as some critics claim?

Lawrence Diller has written the definitive book about this crucial debate--evenhanded, wide-ranging, and intimate in its knowledge of families, schools, and the pressures of our speeded-up society. As a pediatrician and family therapist, he has evaluated hundreds of children, adolescents, and adults for ADD, and he offers crucial information and treatment options for anyone struggling with this problem.

*Running on Ritalin* also throws a spotlight on some of our most fundamental values and goals. What does Ritalin say about the old conundrums of nature vs. nurture, free will vs. responsibility? Is ADD a disability that entitles us to special treatment? If our best is not good enough, can we find motivation and success in a pill? Is there still a place for childhood in the performance-driven America of the late nineties?
